Programming and Playback Features

Hi-Fi Stereo Sound with Built-In MTS/SAP Decoder

Record stereo videotapes from stereo sound sources and playback pre-recorded hi-fi stereo tapes in hi-fi stereo sound using two audio heads and four video heads. Delivers an excellent 90dB+ dynamic range—through a stereo-equipped TV or regular TV and stereo hi-fi home audio system. The built-in MTS/SAP decoder allows reception and recording of off-air television stereo broadcasts and second audio program transmissions, where available. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

VCR Plus+C3™ Easy Taping with Cable Box Control

Simplifies VCR programming by allowing you to simply enter PlusCode® programming numbers, for both regular and Cable TV channels, found in many published television listings. When recording begins, your VCR automatically selects the proper TV channel and program length. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

Auto DBS RecordLink™

If you own a satellite dish, this is the feature you've been waiting for. Set your DBS receiver to turn on and tune in to a specific program and it will automatically turn on the VCR in the record mode and then turn off when the DBS receiver turns off. The secret is in the A/V input jack panel. It senses the presence of a video signal...and the rest is history.

Chroma Noise Reduction

One-Touch Record

8-Event/1-Year Smart Programming

Picture

Crystal Clear™ Video

Guaranteed best picture possible regardless of tape condition. Philips delivers a perfect combination of the following technologies to maximize your viewing experience:

Digital Studio Picture Control

This digital circuit systematically checks tape quality and video condition and then optimizes picture for perfect resolution.

19 Micron Video Heads

Specially designed narrow heads clear up onscreen picture noise and deliver a higher performance quality.

Natural Color

Natural Color gives you a dramatic playback picture by sharpening edges, making color details visible, and removing color noise.

Studio Tracking System

The best solution for enjoying the same excellent picture and sound quality with rental/purchased tapes as with personal recordings.

S-VHS ET

4-Head, Double Azimuth Design 19 Micron Head

SmartPicture™ Auto Head Cleaner

Convenience

SmartClock™ with Time Zone Select

This menu-driven feature automatically maintains the correct time, regularly checking and updating the time if necessary. It also resets the clock after a power failure. The menu-driven time zone feature allows selection of appropriate time for those who live in a time zone other than that of their cable service provider or broadcaster.

Crystal Clear Video, RecordLink, SmartClock, SmartPicture, ShowGuard and Turbo Timer are trademarks of Philips Consumer Electronics Company. VCR Plus+ and C3 PlusCode are trademarks of Gemstar Development Corporation.

Tape Manager

Manage your entire tape collection with easy access to any recording. Tape Manager allows you to store up 330 video cassettes in the VCR memory and helps you instantly determine tape content, locate a particular recording, or even find and access available blank space in your video cassette collection. Each time you make a recording, the Tape Manager assigns your tape a number and stores program title (if available), date, time, channel, and length of recording. Then at the press of a button on the remote control, Tape Manager will let you navigate and sort your entire video collection.

Turbo Timer™

Timer programming has never been easier or faster. You don't even have to turn on the TV. Just push the Turbo Timer button on the remote control. The display of your VCR asks you for the start and end time as well as the program's number. That's it. Just a few seconds.

ShowGuard™ Timer Programmer Backup Memory—Indefinite!

Special Effects

Turbo Drive

The new Philips Turbo Drive cuts fast forward and rewind time in half (about a 75 seconds for T-120 tapes) using a microprocessor to measure tape wheel revolutions. This reduces waiting time between playback for the utmost in speed and convenience. This advanced drive also includes an intelligence system that provides a built-in warning in case of dirty heads, plus a tape position indicator with real time counter and tape remain.

Audio Dubbing

Now you can add background music or personal commentary to video through the easy-to-use audio dubbing feature. Rear audio in/out sockets allow connection to an external stereo audio system.

Remote

VCR/Universal TV/CBL/DBS Remote with Jog and Shuttle dial and Lighted Buttons (Remote # PJVM3.1ML)
